

Certify

Certify™ is Certica's web-based data quality application that continually validates databases for business rule integrity, data quality requirements and potential compliance issues. Certify enables organizations to detect data problems quickly and allows data owners to take immediate action in resolving or correcting errors.

The Certify data quality solution validates data for 4.6 million students each day identifying data issues for discipline, attendance, demographics, special ed data and funding. Now, additional alerts are available which specifically address the California Local Control Funding Formula (LCFF) and its unique requirements for grant funding. With the automated LCFF Scorecard, district and school staff are proactively alerted to data issues that impact state funding levels.

How Can the LCFF Scorecard Help Your District?

With the Certify LCFF Scorecard, automated notifications can be sent to district or school staff when there is missing or invalid data surrounding attendance, enrollment and diverse student populations such as English learners, homeless, migrant students and students with IEPs. The LCFF Scorecard is part of the Certify Rule Library which is a set of rules applied directly to a district's student data, and can help:

- Minimize the likelihood of funding loss due to under-reporting of diverse student populations.
- Significantly reduce the time and effort spent reconciling data discrepancies.
- Ensure that funding is maximized to provide the resources that support all students to reach their full potential.

Examples of LCFF Validations and Alerts in the Certify Rule Library

- Number of English Language Learners
- Number of Foster Students
- Number of Migrant Students
- Number of Students Receiving Individualized Education Plans (IEP)
- Number of Homeless Students
- Monthly Attendance Summary
- Total Number of Enrolled Students
- Class Sizes for Kindergarten through Grade 3
- Number of Students Receiving Free or Reduced-Priced Meals
