

Certify

School districts can be challenged in their ability to submit complete and accurate information to the Texas Education Agency in an efficient and timely manner. To support state reporting mandates, Certica offers Certify™, the web-based data quality application that gives school districts the ability to easily detect, track and report data problems and patterns of non-compliance that may require attention or remediation – before issues result in bigger problems. Certify promotes a data validation and monitoring process that is objective, systematic and repeatable.

Included with Certify is the CertifyPEIMS Rule Library™, which pre-validates TSDS PEIMS state reporting submissions for each reporting period throughout the year. The pre-defined validation rules run against a PEIMS submission format to check for data that is incomplete, inaccurate or otherwise expected to compromise a district's PEIMS data submission.

How Can The CertifyPEIMS Rule Library Help Your District?

The CertifyPEIMS Rule Library supports a highly automated and simple process for pre-validating PEIMS submissions at any time, to:

- Provide an immediate and clear inventory of data issues that need to be addressed in your student system.
- Automatically notify campus personnel of data errors.
- Relieve SIS teams from running manual reports, distributing data errors, and following up with campus staff.
- Reduce the time that district and campus staff spend reviewing and correcting data issues.
- Identify gaps or weaknesses in your reporting processes or information systems.

CertifyPEIMS validates data in these TEDS data categories for all four PEIMS submission periods. . .
