Comprehensive Analytics Enable Districts to Monitor Graduation and Postsecondary Readiness

Videri™ provides comprehensive, real-time visualization of data and dynamic watch lists that enable educators to ensure students are on track for on-time graduation and postsecondary success.

Several factors including attendance, academic engagement and economic status impact the likelihood a student will graduate on time and achieve postsecondary success. These indicators are often stored in different data systems which can make it difficult for educators to identify patterns and trends and plan effective interventions.

With Videri, you can view factors related to graduation readiness in one dashboard and configure dynamic watchlists to help monitor student progress and identify students in need of support to achieve graduation readiness targets.

Videri gives you many ways to view graduation readiness. Dashboards let you visualize key factors such as student growth, absence rate, discipline infractions and summative test scores.
Creating a dynamic watchlist is easy with Videri. Use a Quick Start option, such as an Early Warning indicator, to proactively monitor students with multiple risk factors and make corrections early.

“With the help of Videri analytics, the EC Cares Team can easily access the data to determine at-risk students based on attendance. In addition, discipline and grades are pulled together for a more complete view of what is going on in a student’s life.”
